

COMUNICATO STAMPA

Acque Bresciane launches its inaugural Sustainable Finance Framework

Acque Bresciane has published today its inaugural Sustainable Finance Framework, aimed at supporting the long-term sustainability vision of the Company, providing a link between its financial strategy and sustainability pledges.

Since its foundation, Acque Bresciane has been committed to sustainability, embracing an approach that combines economic sustainability and durability, together with social and environmental dimensions. In 2020, the Board of Directors approved a Sustainability Plan, updated in February 2026 to include two additional objectives. The Plan currently comprises eleven ambitious macro-objectives with a 2045 horizon and fifty-six measurable indicators monitored annually. The eleven targets cover a wide range of areas, including sustainable water management, climate neutrality, customer and employees well-being, sustainable governance, finance and supply chain, and digital transformation.

"With this Framework, we are taking a further step in integrating sustainability into our business model. Responsible water management requires long-term investments, an industrial vision and financial tools that are fully aligned with our environmental and social objectives. The Sustainable Finance Framework strengthens our commitment to stakeholders and confirms Acque Bresciane's determination to contribute concretely to the sustainable transition of the communities we serve" said the President of Acque Bresciane.

The Framework is structured into two components: Green & Blue Finance and Sustainability-Linked Finance sections.

The Green & Blue component aligns with the ICMA Green Bond Principles 2025, the LMA, LSTA and APLMA Green Loan Principles 2025, as well as the Blue Finance guidelines published by the ICMA and International Finance Corporation.

It allows the financing and/or refinancing of Green & Blue eligible projects, mainly related to ensuring a sustainable water and wastewater system, in line with the core business of Acque Bresciane.

The Sustainability-Linked component aligns with the ICMA Sustainability-Linked Bond Principles 2024 the LMA, LSTA and APLMA Sustainability-Linked Loan Principles 2025, as well as the Blue Finance guidelines from ICMA.

Sede legale

Via Cefalonia, 70
25124 Brescia (Bs)

Sede amministrativa

Via XXV Aprile, 18
25038 Rovato (Bs)

Sede operativa

PADENGHE S/GARDA (Bs)
Via Italo Barbieri, 20

SIRMIONE (Bs)
Piazza Virgilio, 20

DARFO BOARIO TERME (Bs)
Corso Italia, 34.

SONICO (Bs)
Via Nazionale, 21

GARDONE VALTROMPIA (Bs)
Via Mameli, 2/R

This section integrates measurable ESG targets into financial instruments, including Acque Bresciane's commitment to reduce Scope 1, 2 & 3 GHG emissions, reduce water leakages, narrow the gender pay gap and grant high levels of treated wastewater quality.

The Framework was structured with the support of Intesa Sanpaolo – IMI CIB Division acting as Sole Sustainability Coordinator, and received a Second Party Opinion from the independent external reviewer Sustainable Fitch, confirming its robustness and alignment with best market practice.
